Swift 2000 range

The year 2000 marks a milestone in man's history. In a similar way, the Swift Caravans 2000 range marks a milestone in a history of more than three decades of quality

and innovation which has earned Swift the distinction of being revered as the thoroughbred of the touring caravan world.

Throughout that history, Swift designers and craftsmen have constantly sought new ways to upgrade existing models and develop exciting new layouts. Today, that search has resulted in a 25-strong fleet of Tourers, fit to mark the Millennium.

The Corniche, Conqueror, Challenger and Classic ranges all display the loving care and attention to detail that has made Swift the setter of standards, and winner of countless awards, over the years.

Quality with Style has been Swift's motto for many years. Investment in advanced computer technology ensures that all models are produced to the same uncompromising quality, whilst Computer Aided Design techniques allow the designers to consider every possible improvement option before a prototype is built.

Such technology automatically checks safety and stability variances at blue print stage. Even so, Swift engineers conduct over 200 stringent physical tests to guarantee absolute perfection. This commitment to quality ensures that all models comply with the New European Standards. It has earned Swift the prestigious ISO 9001 certificate for the standard of quality systems operated by the company.

The same quality ethos extends to the SuperCare aftersales service and SuperSure 3-year warranty that come with your new tourer. Guaranteeing total customer satisfaction and providing a perfect, trouble-free holiday - that's the Swift Way to celebrate the year 2000.
