# A state of mind

As the creator of streamlined and innovative designs, Chausson has the reputation of a trailblazer and holds the key to inventiveness.

From historical models like the Acapulco to the brand-new 711, a low profile with a revolutionary layout, innovation is what drives us forward.

With Chausson, you'll discover how to create your own horizon...

## Standard\* extras

### Long-lasting protection

- An **IRP structure**  
A major innovation for improved insulation, better resistance and greater protection. See page 10.
- A **seven-year warranty**... Who can top that?  
**Water tightness is a key feature of your motorhome; at Chausson it's guaranteed for seven years** (with an annual check-up by a certified network member). The extent of this warranty goes well beyond the standards of the profession. It's the best pledge of peace of mind that Chausson can give you.
- **165 dealers to keep watch** on your motorhome  
Our network of dealers is made up exclusively of true recreational vehicle specialists who know Chausson backwards and forwards. Chausson offers one of the market's most extensive and best-equipped European networks.

### A vision of quality

- **Legendary SEITZ windows**, the best choice  
They're synonymous with outstanding practicality, excellent quality, easy handling and top safety because they can't be removed from the outside.
- **Panoramic cabin roof** that can be opened for a breath of freedom  
It's great for ventilation and even better for light... At Chausson, well-being is also important.

### Optimal storage, depending on the model

- A full-width **hold**  
Two, and even three, standard doors to make loading easier and more optimal. For us, it's obvious.
- A lowered **hold**  
Your back will appreciate this handy storage solution that's easy on your muscles!
- **Reinforced chassis extensions** in galvanized steel  
The sturdiness of our motorhomes is no accident; it's the result of choosing strong materials. For chassis extension, we use galvanized steel reinforcement that's more robust and long-lasting.
- **Lighting for the hold**  
Whatever the version line, all our garage holds are illuminated and 12 V/220 V socket.

### Easy accessibility

- **Easier access** is not a minor detail; it's essential!  
There's no need to unfold a step plate, it's built in, for a more stylish and handy access.
- Just **one key** for the entire unit  
You won't need a fistful of keys!  
At Chausson: just one key for the unit (main door and garage doors), just one key for the carrier.
- An **insulated unit step**  
All our models are equipped with a protective hull under the unit step that ensures better soundproofing and thermal insulation.

### Carrier choice

- An **essential element** for high-quality travel  
At Chausson, we've chosen reference brands that are able to supply a specifically designed chassis for the motorhome, and we have a specially equipped after-sales network trained in the leisure vehicle market. See page 14.

### Heating you can use on the road

- You can use all our heating systems on the road with no constraints. This is ideal for your passengers and very handy for heating the unit before you stop for the night. See page 11.

## Comfortable fixtures

- **High-quality bedding**  
See page 13.
- **Easy Bed** adjusts to the height you want  
Most of our beds over garage holds (except for twin beds) can be height-adjusted over a distance of 30 cm.
- **Clever storage areas**  
Most of our beds over a hold can be raised for easier access to the storage areas.

## Well-designed ventilation

- **Double ventilation**  
It doesn't take much experience with motorhomes to know that ventilation in the bathroom is essential. At Chausson, most of our bathrooms have both an opaque window that can be opened and a skylight in the roof.
- **Rigid shower partitions**  
Whatever the version, all our motorhomes are equipped with elegant rigid partitions, never with a PVC curtain.

## Useful pre-equipment

- **Standard bike carrier adapters**  
To avoid any risk of infiltration, bike carrier adapters are installed as standard equipment so that you won't have to drill holes. All you need to do is choose your bike carrier!
- **Pre-wiring for a backup camera**  
To reduce assembly time (and therefore cut workshop costs), all our campers are pre-wired for a backup camera that can be installed by your dealer. Standard camera on Welcome and the special edition.
- **TV pre-equipment**  
Whatever the version, all our motorhomes have at least one 220 V/12 V TV-antenna outlet.

## Well-designed lighting

- **100% LED lighting on the inside**  
100% LED lighting provides ten-fold savings in energy and a product lifecycle that is thirty times longer. A bright choice for you and the planet!
- **Night lighting**  
Night lighting is designed for a cozy atmosphere and for your safety with built-in LEDs near the floor.
- **Outside lighting** as a standard feature, whatever the range level.

## High-end seating

- The foam in our cushions has been specially designed to offer firm seating comfort (without sagging over time) and high-quality, resilient support for your back.
- For greater passenger comfort, each road seat is equipped with a height-adjustable headrest.

## Solutions for greater comfort

- **Drawers won't slam shut**  
Whatever the version line, all our drawers have cushioned closing and latches to avoid accidental opening when you're on the road.
- **Adjustable living room table**  
For easier circulation and greater comfort in the living room, all our low profiles have a central table\*\* that can be adjusted in height (telescopic pedestal), longitudinally and crosswise.
- **A maxi refrigerator is NEVER an option**  
Only some of our compact models (less than 6 m) don't have one, simply because it's not technically possible to install one.  
All our refrigerators are triple-mixtriple-mix: they can be used with gas or 12 V or 220 V electricity. At Chausson, energy selection is automatic (AES), whatever the range level, just compare !

\* For most of our overcabs, low profiles and A-class. For details, see the technical data sheet.

\*\* Except on the 514, 637, 638.

## The IRP structure, a major innovation

With IRP, Chausson is true to its goal of high-quality manufacturing. Whether the version is Flash or Welcome, our structures are all made with the same high standard of quality.

IRP is a major innovation that provides better **insulation**, greater **resistance** and improved **protection**.

Just have a look at the core of our manufacturing secrets...

Better **insulation** relies on a combination of technologies that ensure well-being

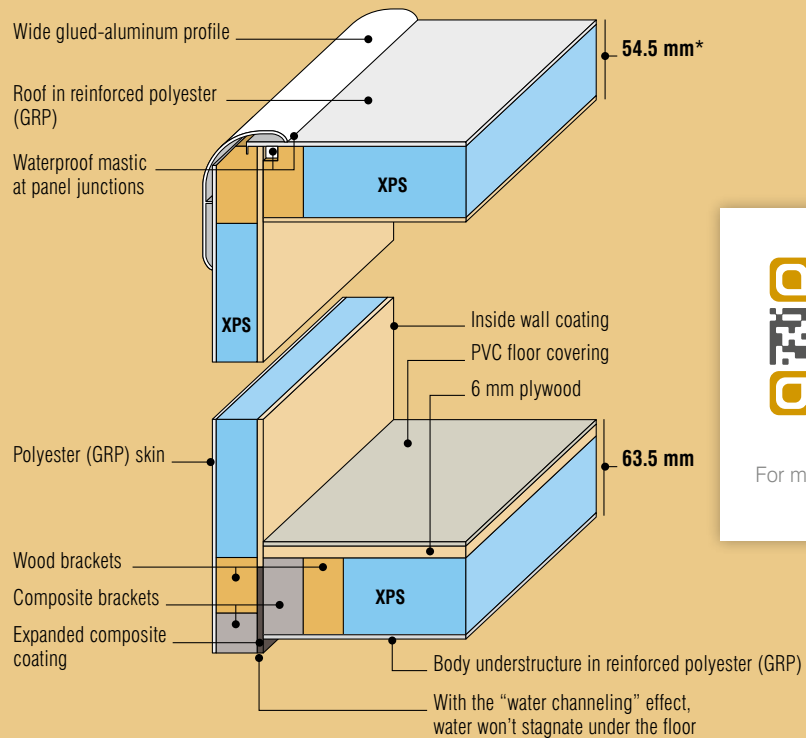

- **XPS insulation**, an extra-firm foam with high sound and thermal insulating power. CHAUSSON has chosen the market's most renowned brand: Styrofoam.
- **Specially designed floor and roof thickness** for insulation that exceeds the usual norms.

For better **resistance**, a reinforced structure

- Protective **polyester (GRP) skin**, provides greater resistance to scratches, minor impacts, gravel, hydrocarbons, ultraviolet radiation and bad weather in general.
- Extra-thick **floor and roof**, among the best on the market, offering greater resistance to loads and limiting deformation over time.
- High-performance **wood and composite** combination, reinforces the structure of our walls and floors by combining composite longevity with the exceptional sturdiness of solid wood.
- A **water-tight** shield, all materials in contact with the exterior are rot-resistant and insensitive to humidity. On the inside, we prefer high-quality wood.

\* NB: because of its particular shape, the roof of our overcabs uses a specific technology, 34.5 mm thickness, EPS insulation.

For more information  
scan me.

No compromises means peace of mind and better **protection**

- Against **leaks** because of our rot-resistant materials and wide aluminum profiles that are glued on instead of drilled.
- Against **storms** because of the polyester (GRP) covering that limits damage from hail (on the roof and walls) or salt (under the floor).
- Against **heat, cold** and **noise** because of polyester (GRP) and a rarely matched insulation thickness.

Proof of our confidence: a seven-year warranty

For 35 years, our goal has been to continually improve comfort and durability; we are convinced of the effectiveness of our technical choices and manufacturing processes.

Standing behind our convictions, we offer you a **seven-year warranty on water-tightness**, subject to an annual check-up by a certified member of our network.

## The all-in-one technical area

Accessible from a special outside door, the Technibox provides a single place for all the essential controls that ensure proper operation of your motorhome.

The Technibox is sealed with a lockable watertight door that opens on two different technical compartments:

- the **electricity** area gives you access to the electrical panel: no more contortions when you change a fuse!
- The **clean water** area lets you:
  - fill the water reservoir,
  - adjust reservoir capacity according to the number of travelers and/or the load transported,
  - easily clean the reservoir for maximum hygiene.

This compartment has a tray for collecting spilled water; water won't stagnate in the compartment and drains out through the opening designed for this purpose.

The Technibox is standard on all our overcabs and low profiles.

### Electrical technical area

Electrical panel  
Access to fuses  
Charger/battery power  
Protective cover

### Clean water technical area

Purging valve for the clean water reservoir  
Cleaning hatch  
Water reservoir filling with a swivel elbow

230 V outside power outlet

## Maximum protection for people

Because Chausson doesn't need to be constrained by a standard in order to ensure maximum protection for customers, all our motorhomes have a 30 mA differential circuit breaker as a standard feature.

In contrast to a traditional circuit breaker that protects equipment, the differential circuit breaker also protects people. It will automatically shut off the current if it detects a loss of current corresponding to defective insulation. This device thus allows protecting against short circuits and conductor overheating in case of overload.

## Fuel heating

### For more economical gas consumption

The choice of gas represents a real user cost, especially in winter or in cold regions where the cylinder must be changed every four or five days on average. In addition to offering comfortable independence, fuel heating saves money with a maximum full-power consumption of 0.5 L/hour.

### Forget about refill anxiety

In contrast to gas, which is sometimes difficult to find in another country and may have an incompatible connection, gas oil is available almost everywhere on earth.

### Easy to use, no manipulation

Just a glance at the fuel gauge on your dashboard will tell you whether you have enough left. Forget disagreeable surprises and changing cylinders in the middle of the night. With Chausson, you won't have to bother with gas cylinders. Only the refrigerator, the hot plate and sometimes the water heater are connected to a gas supply.

### Less loaded weight and additional space

Choosing gas oil heating also means lightening the loaded weight of the motorhome. Two 13 kg gas cylinders really weigh 52 kg (13 kg corresponds to contents only). Not having to bring them along represents a significant reduction in weight. By using just one gas cylinder, you have less weight and more storage space.

### Use while on the road with total safety

In contrast to gas, which requires using a protected circuit that closes off the gas supply in case of impact, fuel heating can be used while on the road, permanently and with total safety.

In addition to road comfort for your passengers, you'll appreciate finding a cozy, warm unit when you stop.

Many of our competitors propose this choice in option, while others don't have it at all.

### An optimized bedroom

- **Standard 160-cm-wide island bed**  
See page 13.
- **High-quality bedding**  
See page 13.
- **Easy Bed** with adjustable height  
Most of our beds over a hold (except for twin beds) can be height-adjusted over a distance of 30 cm.
- **Clever storage areas**  
Our rear bedrooms generally have roof closets above the bed(s). Most of our beds over a hold can be raised for easier access to the storage areas.
- **Deep closet(s)**  
With automatic lighting when the door opens for the Welcome and Exaltis versions.
- **Reading lamps**  
In general, bedding is equipped with individual reading lamps to avoid disturbing others.

### A real fully-equipped kitchen

- **A maxi refrigerator AES**  
Most models feature a 161 Ltr refrigerator or a 145 Ltr "Slim" refrigerator.
- **Stove top** with glass cover  
When the cover is open, it protects the wall from cooking splatters. When closed, it becomes a work surface.
- **Soft-close drawers**  
With latches for road travel.
- **Trap door for storage** under the refrigerator  
Depending on model.

### A practical bathroom

- **Dual ventilation** (depending on model) with **opaque opening window** and **roof skylight**
- **Dual drain shower tray**  
Most of our shower cubicles have two stopper openings for optimal water drainage.
- **Soap dish, glass holder and skylight** equipped with a **towel rack**

### The driver's seat

- **Comfort and safety** behind the wheel  
See pages 14 and 15.
- **Storage area** over the cab  
All our low profiles feature a thermoformed storage space above the cab with LED lighting on each side.
- **Dual USB port**  
To recharge cell phones, tablets, etc.

## High-quality bedding

For a little nap after lunch or a refreshing night's sleep: there's nothing like a good rest before a new hike, a mountain bike circuit or a visit to see the local sites. Stretch out and enjoy, you're in a Chausson...

### A comfortable mattress with a sturdy slatted base

- All our mattresses are:
  - manufactured in France,
  - specially designed for our motorhomes with high-quality foam.
- All our mattresses are encased in a drill fabric that is:
  - antibacterial and anti-dust mite (for optimal hygiene),
  - certified OEKO-TEX® Standard 100 (free of substances harmful to health).
- On Welcome and Exaltis models, all our mattresses (for the main bedding) have:
  - high-resilience foam that adapts perfectly to the shape of your body for minimum pressure,
  - a thermal-regulating Feran Ice covering for better dissipation of body heat,
  - a layer of reinforced wadding for a soft feel and optimal-quality bedding.

Most of our main bedding comes with a sturdy slatted base as a standard feature for greater comfort and ventilation, with a metal frame for better resistance. Overcab bedding also has special anti-condensation plates and can be raised (to facilitate going back and forth between the unit and the cab), leaving an extra-large 155 cm space!

### Island bed width, 1.60 m

- Chausson once again pioneers by offering an exceptional standard width of 160 cm on all island beds, regardless of range level.

### All our twin beds are 90 cm wide

- In addition to an advantageous length, Chausson offers most of these models with twin beds in an exception width for the market: 90 cm (except for the 757).

### An adjustable roof bed

Unless the roof bed is the main bed, all our low profiles (except 711) can hold another optional single or double roof bed, depending on the model\*\*.

- During the day, the roof bed slips into the roof to leave room for an exceptional lounge area and in the evening becomes a main bed or a "guest room" for friends.
- All our roof beds are electric but can be raised manually if necessary.

On all models with a maxi lounge, the main roof bed has a lower position that is easy to reach without having to use a ladder.

\* Depending on country.

\*\* Electric hideaway bed (1 place max. 150 kg, 2 places max. 250 kg).

### Choose your type of bed!

#### Central bed

#### Twin beds

#### French berth

#### x2 Bunk beds

#### transverse bed over garage hold

# The chassis, an essential element for high-quality travel

At Chausson, we have chosen reference brands that are able to supply a specifically designed chassis for the motorhome, and we have a specially equipped after-sales network trained in the leisure vehicle market.

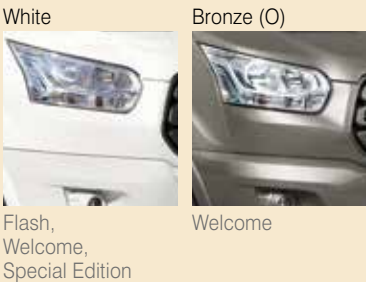

Ford and Chausson have been partners for over thirty years. With more than seven million vehicles sold worldwide, the legendary Ford Transit has more than proven its worth.

- It's equipped with the latest technology and new functions for safety and comfort.
- 1 Motorhome chassis with a lowered center of gravity for easier access.
  - 2 The wide rear track optimizes inside space and road stability.
  - 3 - Driver's **airbag**,
    - **braking assistance** (ABS): an anti-lock system that keeps wheels from blocking when brakes are applied intensively,
    - **anti-slipping** (ASR): a system that regulates acceleration to keep the driving wheels from losing traction,
    - **dynamic trajectory control** (ESP): this program optimizes stability on the road and in curves and improves braking,
    - six-speed manual transmission,
    - **hill-start assist function**,
    - disengageable hand brake.
  - 4 Swivel seats in the cab, with double armrests and adjustable height.
  - 5 - Ford Audio System with AM/FM radio, Bluetooth®, USB ports and an auxiliary plug for connecting a Smartphone or hands-free phone or listening to music,
    - leather-encased steering wheel,
  - 6 Central locking of cab doors.
  - 7 Wide side protectors in the body colour.
  - 8 - **16" wheel**,
    - tyre repair kit.

**New Ford automatic transmission** (option)

Featuring six gears, the transmission uses a torque converter and an electronic gear-changing system.

The new transmission is able to detect a slope or mountainous terrain and will automatically provide assistance on hills in "drive" mode.

Fiat is still THE reference brand on the motorhome market and the reliability of the Ducato is well established.

For service, you benefit from 1,800 specialized "Fiat Camper Assistance" workshops in Europe and 24/7 phone assistance.

The Fiat equipment chosen by Chausson has everything you need to broaden your horizons with optimal comfort and full safety.

- ① Motorhome chassis with a lowered center of gravity for easier access.
- ② The wide rear track for greater road stability and more room inside.
- ③ - Driver's **airbag**,
  - **braking assistance** (ABS): an anti-lock system that keeps wheels from blocking when brakes are applied intensively,
  - **anti-slipping** (ASR): a system that regulates acceleration to keep the driving wheels from losing traction,
  - six-speed gearbox.
- ④ Very comfortable "**Captain's chair**" seats: these new Fiat seats have a built-in headrest, a wider back, better lateral support, two armrests and a seated position that's more comfortable than ever. They are height- and angle-adjustable as a standard feature.
- ⑤ - Pre-equipped for cab radio and loudspeakers,
  - electrically controlled windows,
  - central bottle-carrier console with a cell phone compartment.
- ⑥ Central locking of cab doors.
- ⑦ **Radio antenna built into rear-view mirror.**
- ⑧ - Hubcaps on wheels,
  - tire repair kit.

Exaltis

Anthracite (O)

Welcome

The **Comfort-Matic gearbox** (option) not only reduces wear, it lowers fuel consumption by always triggering the optimal gear ratio, whatever the circumstances.

It is notably different from automatic transmissions with a hydraulic torque converter because it reacts as quickly as a manual gearbox. It uses the same six-gear ratio, while the clutch and choice of ratio are steered by an electro-hydraulic actuator.

C656 Flash Auckland

# OVERCABS

Defy space

The latest generation of Chausson overcabs has outstanding livability. A line designed for the family and based on accessibility and comfort.

Flash

635 Flash Auckland

# LOW PROFILES

Total flexibility

Flash is the key to entering the Chausson motorhome world: this version features an exceptional equipment-to-price ratio, with everything essential in standard at no sacrifice in quality.

Welcome\* is the standout among Chausson low profiles. This level of finishing is especially designed for experienced motorhome owners who want superb design and more equipment.

\* Depending on model; see the technical data sheet.

**Flash, Welcome**

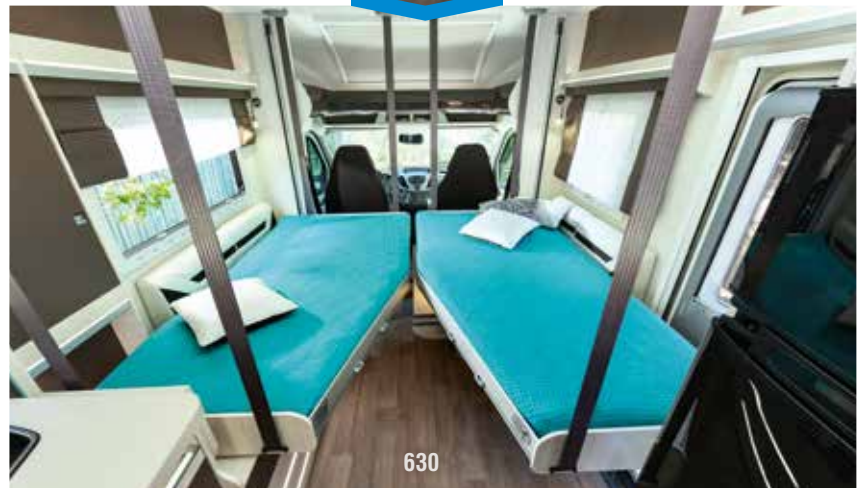

630 Welcome Seychelles

## Maxi lounge low profiles

As shown by the success of the now-legendary 610 and 630, Chausson is a pioneer with layouts that are unique on the market. They all have an electric roof bed that slides away during the day to leave room for a big, friendly lounge area.

711 Welcome Travel Line Elite

## 711 Welcome Travel Line

The 711 is unique on the market and is designed for four.  
For comfortable travel, there are four car seats and four access doors.  
For comfort when you stop, there are two lounges and two double roof beds.

Design patent

747GA Welcome Madame

## Smartlounge

This very clever new lounge concept provides comfort, attractiveness and practicality both on the road and when you stop. Each of the two benches can quickly be transformed into comfortable seats for road travel.

Patent pending

716 Flash Auckland

Unique on the market, the 716 is the first family low profile with roof beds that are bunk beds. During the day, these beds disappear into the roof, leaving a play and relaxation area for children.

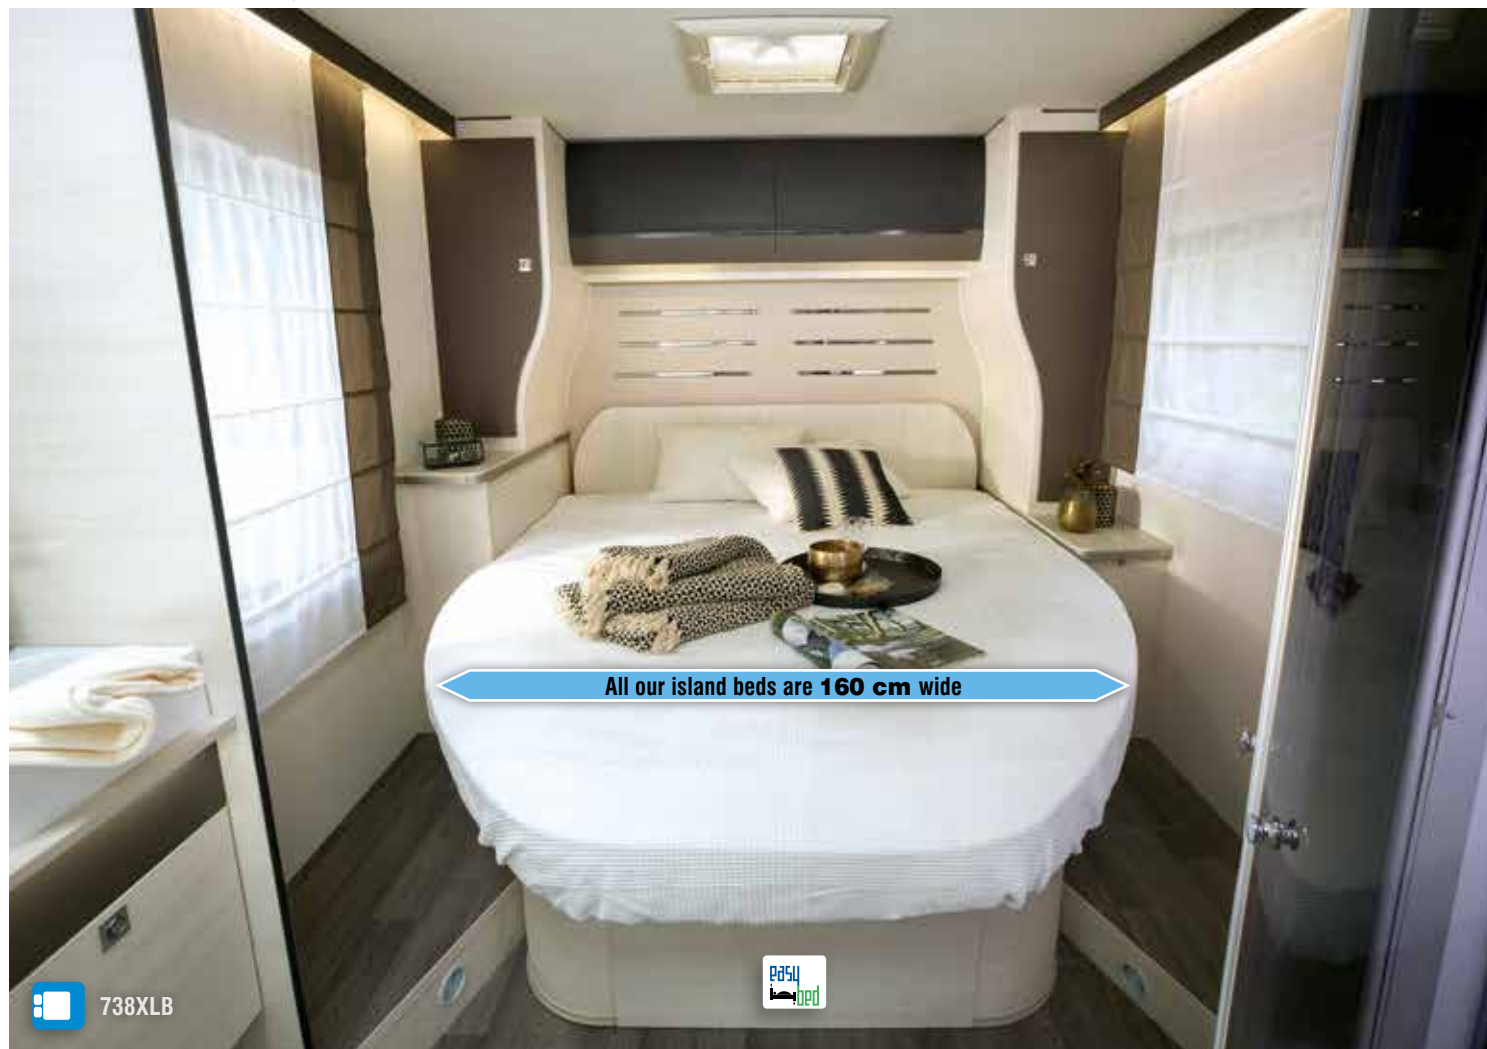

In front, a large family lounge makes way for a real double bed in just seconds.

Patent pending

# Sweet dreams

All our  
hideaway beds  
are **electric**

See page 13.

# Bathrooms

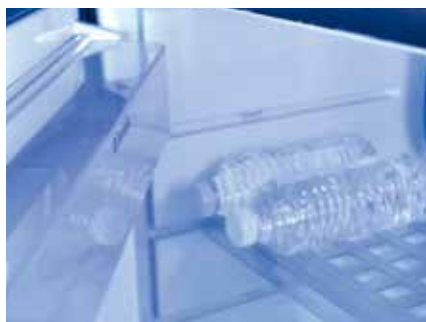

Most of our shower stalls have **two stopper openings** for optimal water drainage.

**Towel rack** under the skylight.

Kitchen with **soft-close drawers** and latches for road travel.

## The kitchen

167 Ltr **refrigerator** or a "Slim" refrigerator up to 145 L.

All our stove tops have a glass cover:  
- when the cover is open, it protects the wall from cooking splatters,  
- when closed, it becomes a work surface.

# Standard equipment

**Choice of chassis**, most of our low-profiles are available either on Fiat or Ford, see page 14/15.

**IRP structure**, a major innovation, see page 10.

**Water tightness guaranteed for seven years**, with an annual check-up by a certified network member.

**Panoramic cab** roof that opens and comes with a shade and screening. Thermoformed storage space above the cab with **LED lighting** on each side.

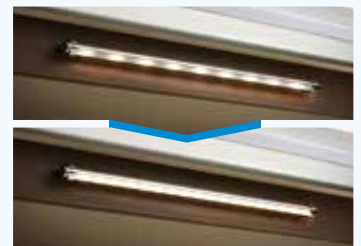

**Driver and passenger seats** swivel and can be height-adjusted; equipped with covers (Welcome version) that match the living unit fabric.

**Dual USB port** above the cab for recharging cell phones, tablets, etc.

**100% LED lighting inside and outside**, for high light yield and recyclable technology.

**Choose your lighting level**, most models feature latest-generation LED strips with a sensor switch for two lighting levels.

**Access handle** for easy entrance to the living area.

**SEITZ double-glazed windows** with screening and shade.

**Central table** (1) that can be adjusted in height (telescopic pedestal), longitudinally and crosswise. A fold-down table is also available on certain models.

**Seat belts** corresponding to the number of regulation seats; at least four belts with three points.

For greater passenger comfort, each road seat is equipped with a **height-adjustable headrest**.

**Pre-equipped with a TV stand** (Welcome version) and one or more outlets.

(1) Depending on model; see the technical data sheet

## Standard equipment (cont.)

All our bedrooms with an island bed have pre-equipment for a second TV as a standard feature.

Most of our beds **over a hold** (except for twin beds) can be **height-adjusted** over a distance of 30 cm; see page 13.

Most of our **beds over a hold** can **be raised** for easier access to the storage areas.

The **ventilator/extractor skylight**, Welcome version (1), allows extracting stale air and ventilating the inside very quickly.

All our models have a **curtain separating the cab and unit** as a standard feature (unless the model has sliding blinds in the cab).

**Heating that can be used on the road**, ideal for your passengers and also very useful for warming the unit before a stop.

On the Welcome model, the inside of the **closet is lighted automatically** when the door is opened.

**Luxurious entry closet** (Welcome version).

**Built-in LED lighting at floor level** to create a soft atmosphere and ensure that it's easy to move around at night in the living unit.

All our low profiles come with a standard **TECHNIBOX all-in-one technical control center**, see page 11.

**Two, and even three, standard doors** (1) to make loading easier and more optimal. All our garage holds are heated, whatever the finishing level.

All our garage holds are heated, and are equipped with 12 V/230 V outlets whatever the finishing level.

**Waste water can be emptied** easily and cleanly using the lateral handle!

**Backup camera** built into the rear band with a screen on the rearview mirror (Welcome).

**LED lighting on the outside.**

## Body

# SPECIAL EDITION

Six “all inclusive” models

This year, as a complement to the Flash and Welcome series, Chausson offers a special “all-inclusive” series with the following main characteristics:

- exclusive interior and exterior styling,
- a choice of six best-seller layouts,
- loads of standard equipment.

**Special Edition**

727GA Special Edition Salinas

# A-CLASS

The Chausson spirit

If you've chosen the integral, you're not ready to accept compromises. We've designed it without forgetting anything: perfect comfort, an optimal living area, available on a special frame or an Al-Ko frame at a very reasonable price.

\* Depending on country.

## Sweet dreams

See page 13.

### Choose double flooring!

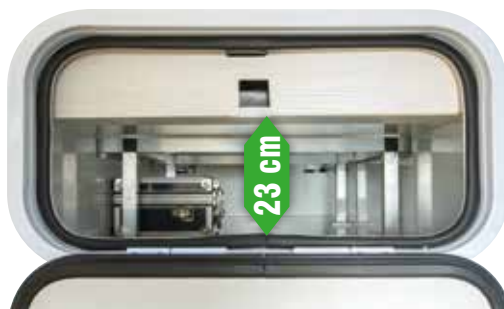

- Measuring 23 cm in height, insulated, heated and housing the water, gas and electricity circuits,
- featuring thermal and sound insulation, protection against freezing for water reservoirs and supplementary insulation against cold and roadway noise thanks to the air space between the two floors,
- providing storage space, with access to the double floor through trapdoors on the inside and hatches on the outside.

#### Exaltis A-class vehicles with a double floor are:

- **built on an Al-Ko AMC chassis**,  
an innovative concept based on lighter construction:
  - optimized road hold with independent wheels and a wider-track rear axle,
  - less weight without compromising the excellent stability of the frame construction,.
  - low-slung chassis that lowers the center of gravity (better road hold) and allows adding a double floor without increasing overall camper height.
- **equipped with ALDE heating**:
  - heating based on heat-conveying fluid, just like in conventional homes,
  - heat emitted by hot water is silent, evenly distributed and all-around, ensuring a healthy, dustless atmosphere with natural humidity,
  - continuous production of hot water for shower and kitchen,
  - operates using either gas or electricity (230 V), or both simultaneously, in case of a need for maximum power (heating the camper from a cold state in winter).

## Bathrooms

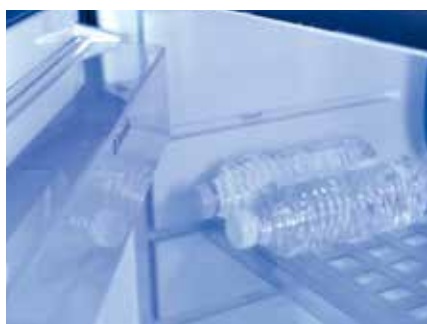

Kitchen with **soft-close drawers** and latches for road travel.

## The kitchen

175 Ltr AES **refrigerator** with elegantly curved doors and a mirror effect.

All our stove tops have a glass cover:  
- when the cover is open, it protects the wall from cooking splatters,  
- when closed, it becomes a work surface.

# Standard equipment

The **Fiat chassis**, an essential element for high-quality travel; see page 14.

**XPS insulation Styrofoam**, an extra-firm foam with high sound and thermal insulating power; see page 10.

**A water-tight shield**: all materials in contact with the exterior are rot-resistant and insensitive to humidity.

**Water tightness guaranteed for seven years**, with an annual check-up by a certified network member).

Swivel **seats for driver and passengers** that are height-adjustable and have covers in the fabric chosen for the living unit.

**L-shaped living room** with adjustable central table.

The foam in our cushions has been specially designed to offer **firm seating comfort** (without sagging over time) and **high-quality, resilient support** for your back.

Frequently located above the kitchen, the SEITZ 700 x 500 mm **panoramic skylight** adds light and ventilation.

For greater passenger comfort, each road seat is equipped with a **height-adjustable headrest**.

**100% LED lighting inside and outside**, for high light yield and recyclable technology.

**Pre-equipped with a TV stand** and one or more outlets.

**Heating that can be used on the road**, ideal for your passengers and also very useful for warming the unit before a stop.

**Luxurious entry closet**.

Most of our **beds over a hold** (except for twin beds) can be **height-adjusted** over a distance of 30 cm; see page 13.

Most of our **beds over a hold** can be **raised** for easier access to the storage areas.

**Built-in LED lighting at floor level** to create a soft atmosphere and ensure that it's easy to move around at night in the living unit.

**Backup radar**.

**LED lighting on the outside**.

## Optional equipment

Powerful **6,000 W heating** for maximum comfort in the unit.

Al-Ko pneumatic suspension.

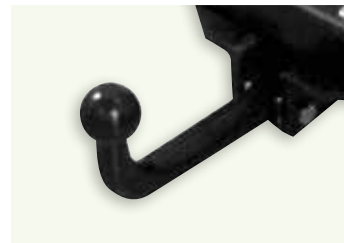

**SEITZ double-glazed windows** with screening and shade.

ALDE central heating (1).

**Access handle** for easy entrance to the living area.

**Coupling** authorized up to two tons.

\* Option

(1) Depending on model; see the technical data sheet.

**Two, and even three, standard doors** to make loading easier and more optimal. For us, it's obvious (1).

### Pack\*
